**FOOTNOTES**

1. A melting point determination is not applicable since the subject product is a formulated product.
2. A boiling point determination is not applicable since the subject product is a formulated product.
3. A solubility determination is not applicable since the subject product is a formulated product.
4. A vapor pressure determination is not applicable since the subject product is a formulated product.
5. A dissociation constant determination is not applicable since the subject product is a formulated product.
6. A partition coefficient determination is not applicable since the subject product is a formulated product.
7. A stability determination is not applicable since the subject product is a formulated product.
8. A flammability study is not applicable since the subject product does not contain any flammable components.
9. An explodability study is not applicable since the subject product does not contain any explosive ingredients.
10. A miscibility study is not applicable since the subject product is not diluted with petroleum distillates.
11. A dielectric breakdown voltage study is not applicable since the subject product is not used around electrical equipment.
